

## Brite and Sleeved Can Shortages

As many of you are aware there is a shortage of aluminum. The nationwide shortage has affected the supply chain of aluminum cans. We are doing our best to forecast our demand for sleeved and brite cans. We will need to work together to make sure that our supply of cans meets the demand of the businesses we serve.

To better meet demand during the shortage we need breweries to help us plan for their needs throughout the end of the year. In order for us to properly plan we would like to know what brewers have forecasted at a minimum of 90 days out, this goes for sleeved and brite cans. Our supply of brite cans will be heavily allocated moving forward, or until supplies stabilize.

**Sleeved Cans:** The processing period has changed from 5-6 weeks to 8-10 weeks due to can availability. We need to forecast out a minimum of 10 weeks to guarantee.

**Brite Cans:** Supplies are out 4-5 weeks on brite cans. We need to forecast out a minimum of six weeks to guarantee. Supplies may take as long as December to stabilize.

We are changing our policy in hopes that we can accommodate everyone's needs heading into the close of this year. It has been a hectic year for the industry, but these changes should allow us to supply everyone with what they need.

Cheers,
